

The Weddell Sea & the South Sandwich Islands

From **14/03/2022**
to **31/03/2022**

Ship: **LE COMMANDANT CHARCOT**

From **Punta Arenas**
to **Montevideo**

Night in Santiago + flight Santiago/Punta Arenas + transfer

An important procedure conditions your departure: in order to be able to arrive on Chilean territory, a mobility pass is required. The delay to obtain it can take 30 days, we kindly ask you to make your request as soon as possible. To do this, you must validate your vaccination schedule on the site <https://mevacuno.gob.cl/> in order to obtain this mobility pass (up to 30 days from your request).

From Patagonia to the Antarctic peninsula, via South Georgia and the South Sandwich Islands, this **all-new itinerary** will take you into the heart of **the Scotia Arc**.

This volcanic archipelago at the junction of the Andes cordillera and the Antarctic Andes will be revealed to you in all its riches and splendour. **All the wildlife of the Far South** can be found there: king and gentoo penguins, elephant seals, fur seals mingle on the beautiful dark sand beaches... At sea, orcas, humpback whales and other cetaceans will escort you along your navigation through frozen waters.

This cruise will also be an opportunity to discover **four very different ecosystems**, from the wooded heights of the Tierra del Fuego and the table top icebergs of the **Weddell Sea** to the glacier-covered mountains of the **South Sandwich Islands** and the snow-capped summits of **South Georgia**.

We are privileged guests in these extreme lands where we are at the mercy of weather and ice conditions. Our navigation will be determined by the type of ice we come across; as the coastal ice must be preserved, we will take this factor into account from day to day in our itineraries. The sailing schedule and any landings, activities and wildlife encounters are subject to weather and ice conditions. These experiences are unique and vary with each departure. The Captain and the Expedition Leader will make every effort to ensure that your experience is as rich as possible, while respecting safety instructions and regulations imposed by the IAATO.

The information in this document is valid as of 27/01/2022

The Weddell Sea & the South Sandwich Islands

YOUR STOPOVERS :

PUNTA ARENAS

Embarkation 14/03/2022 from 16:00 to 17:00

Departure 14/03/2022 at 18:00

Capital of the Magallanes Region and of the Chilean Antarctic, this handsome port city will charm you with its history and traditions. Once inhabited by several indigenous tribes, Punta Arenas has maintained an architectural style that remains true to its heritage.

CROSSING THE DRAKE PASSAGE

Arrival 15/03/2022

Departure 16/03/2022

Use your days spent in the Drake Passage to familiarise yourself with your ship and deepen your knowledge of the Antarctic. The Expedition Leader will first present the IAATO rules of conduct that must be observed during landings in the region and will explain everything you need to know about the zodiac outings. Lectures about the history and wildlife of the Antarctic will be an opportunity for you to learn more about this magical region, where every cruise is a unique experience. From the ship's bridge, you will experience exceptional sailing moments before joining the naturalist-guides on your ship's exterior decks to look out for albatrosses, cape petrels, and other seabirds flying over the Drake Passage.

SOUTH SHETLAND ISLANDS

Arrival 17/03/2022

Departure 17/03/2022

On the edge of the Antarctic Peninsula, 120 km (70 miles) from the White Continent, the **South Shetland Islands** offer surreal and mysterious scenery. On these volcanic islands of dark rock, the landscapes alternate between long, jagged and snow-covered coast and large, gently sloping bays. These lunar and wild lands are home to important scientific research stations and a large number of animal species: chinstrap penguins, crabeater seals or Weddell seals, Antarctic terns, giant petrels and elephant seals have taken up residence here.

NORTH ANTARCTIC PENINSULA

Arrival 18/03/2022

Departure 18/03/2022

Throughout your time in the north of the Antarctic Peninsula, you will find yourself in the heart of a spectacular decor

in subtle shades of blue and white, surrounded by exceptional wildlife. You will sail through the Antarctic Sound, named after Swedish explorer Otto Nordenskjöld's ship, which was trapped by the ice during an important scientific expedition in 1902. The gateway to the Weddell Sea, this sound is filled with gigantic tabular icebergs and plates of sea ice drifting northward from the coastal areas of this vast sea. It is home to Adelie penguins and a great many leopard seals.

THE WEDDELL SEA

Arrival 19/03/2022

Departure 20/03/2022

Amid the eerie stillness of the **Weddell Sea**, wend your way through a labyrinth of dense **ice floe** and majestic table-top icebergs. Sweeping ice platforms sculpt a landscape unlike any other, populated by **fur seals, penguins, wandering albatross** and other remarkable seabirds. The **Weddell seal** – king of this realm – will welcome you to his territory with a haunting cry that pierces the surrounding silence. You can recognise him by his dark grey coat and spotted belly. Weddell seals have the impressive skill of being able to stay underwater for more than an hour.

SOUTHERN THULE, SOUTH SANDWICH ISLANDS

Arrival 21/03/2022

Departure 21/03/2022

The southernmost island in the Sandwich Islands is a volcano that rises to an altitude of 700 metres. For a long time, this former military base was the source of conflicts between the British and the Argentinians, who finally took possession of the island in 1982 after the Falklands War. While you are there, you may get the chance to observe impressive elephant seals and Adelie or chinstrap penguins.

COOK ISLAND, SOUTH SANDWICH ISLANDS

Arrival 21/03/2022

Departure 21/03/2022

Cook Island, an uninhabited volcano buried under a thick white coat, seems to float on the surface of the ocean. There is a striking contrast between the imposing and peaceful mass of glistening ice and the brown sheer cliffs that loom over its shores. Its highest peak, Mount Harmer, rises to an altitude of 1,115 metres. This island, the largest in the Southern Thule island group, was discovered by James Cook in 1775, the first explorer to have crossed the Antarctic Circle in search of a new continent. In 1819, the Russian explorer Fabian Gottlieb von Bellingshausen christened it as a tribute to this illustrious explorer.

SAUNDERS ISLAND, SOUTH SANDWICH ISLANDS

Arrival 22/03/2022

Departure 22/03/2022

The brown volcanic silhouette of Saunders Island, overlooked by Mount Michael, which rises to an altitude of more than 900 metres, will then come into view on the horizon. The island's frozen and rugged shores are considered very difficult to access. If you have the good fortune of being able to land in this lunar landscape, you will be able to meet

chinstrap and Adelie penguins or attempt to observe the Cape petrels nesting in crevices along the cliff faces. It is one of only eight volcanoes in the world whose summit crater, with a diameter of 700 metres, contains a persistent lava lake. Its most recent eruption was in 2005.

ZAVODOVSKI ISLAND, SOUTH SANDWICH ISLANDS

Arrival 23/03/2022

Departure 23/03/2022

Lying in the north of this archipelago, this majestic volcanic island is often ice-free year round, unlike the islands further south. Different species can be found on either side of this bio-geographic border: Subantarctic species in the north and Antarctic species in the south. Enveloped in the warmth of the volcanic fumeroles, one of the world's largest colonies of chinstrap penguins (over two million individuals) thrives in this ideal environment. This volcanic island was discovered in 1819 by the Russian explorer Fabian Gottlieb von Bellingshausen, who named it in honour of his ship's captain.

AT SEA ABOARD LE COMMANDANT CHARCOT

Arrival 24/03/2022

Departure 24/03/2022

Spend exceptional moments sailing aboard *Le Commandant Charcot*, the world's first luxury polar exploration vessel and the first PC2-class polar cruise ship capable of sailing into the very heart of the ice, on seas and oceans which the frozen conditions render inaccessible to ordinary ships. *Le Commandant Charcot* is fitted with oceanographic and scientific equipment selected by a committee of experts. Take advantage of the on-board lectures and opportunities for discussion with these specialists to learn more about the poles. Participate in furthering scientific research with PONANT and let us discover together what these fascinating destinations have yet to reveal to us.

SOUTH GEORGIA

Arrival 25/03/2022

Departure 26/03/2022

Aboard your ship, discover **South Georgia**, a region formed by an underwater mountain chain that extends from the Andes to the Antarctic Peninsula. All the wildlife of the Far South can be found there: **king and Gentoo penguins, elephant seals, fur seals...** You might get the chance to discover the majestic glaciers of Gold Harbour and the vast plains of Fortuna Bay. If you are fortunate enough to land at Salisbury Plain, you can expect a wonderful spectacle: more than 300,000 king penguins, which you will recognise by the bright orange mark on their head and neck, have taken up residence there.

AT SEA ABOARD LE COMMANDANT CHARCOT

Arrival 27/03/2022

Departure 30/03/2022

Spend exceptional moments sailing aboard *Le Commandant Charcot*, the world's first luxury polar exploration vessel and the first PC2-class polar cruise ship capable of sailing into the very heart of the ice, on seas and oceans which the

frozen conditions render inaccessible to ordinary ships. *Le Commandant Charcot* is fitted with oceanographic and scientific equipment selected by a committee of experts. Take advantage of the on-board lectures and opportunities for discussion with these specialists to learn more about the poles. Participate in furthering scientific research with PONANT and let us discover together what these fascinating destinations have yet to reveal to us.

MONTEVIDEO

Arrival 31/03/2022 early morning

Disembarkation 31/03/2022 at 07:00

Perched on the far southern tip of Uruguay, **Montevideo** is a white city, and one of the loveliest capital cities of South America. Come and admire the beautiful historical remains dating from Spanish rule; you'll find the most interesting within the **Cuidad Vieja**, formerly fortified, its old town dates from the 18th century. The best preserved are the cathedral and the former governmental palace of the **Cabildo**, both listed historical monuments. In the crook of a vast blue bay, the city is also blessed with **beautiful beaches**.
